

Your Best Defense Against Identity Theft

DEFENDER™ ENVELOPES

Everyday, thousands of unsuspecting people are being skimmed. Their personal information is falling into the hands of identity thieves across the globe creating major financial headaches for the victims.

What is RFID Skimming?

As embedding Radio Frequency ID (RFID) chips in bank and credit cards becomes more commonplace, so to are the opportunities for identity thieves to swipe valuable personal and financial information from unsuspecting consumers.

Using home-built devices, identity thieves can make "skimmers" that can intercept the information transmitted via radio frequencies, they just have to be a few feet away from an RFID chip in a pocket, purse or wallet.

So, what precautions can you take to prove to your customers that protecting their private information is of the utmost importance to your business? You can start by offering them a GAM Defender Envelope!

What Can You Do?

GAM Defender Envelope - GAM's RFID Shield-DEFENDER™ envelopes are FIPS 201 (Federal Information Processing Standard) certified. They are made from a multi-ply paper/film/foil laminate that acts as a security barrier to prevent fraudulent radio frequency identification (RFID) skimming of sensitive information. This innovative material shields and protects information on smart (debit/credit) cards, e-passports, employee IDs, access control cards and the new enhanced driver's licenses (EDLs). Energy between the reader and smart cards and RFID devices so personal information stays personal and is protected from identity theft.

Features to feel secure about:

Looks and feels like paper - can easily be printed or converted into any size envelope, envelope sleeve or envelope inserting product.

Made with archival paper that is chain-of-custody certified.

Water-resistant, lightweight and tear-resistant.

Pressure sensitive adhesive activation labels, can be crafted from this material that protects cards and tags that have an integrated circuit (IC) construction like the one pictured above.
